

AMENDMENTS TO THE DRAWINGS

The attached sheets of drawings include the added new Figures 7 and 8.

REMARKS

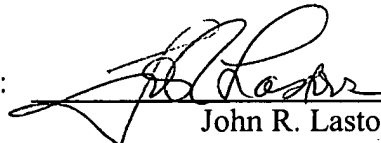

Further to the Amendment filed November 22, 2010, Applicants hereby submit two additional new Figures 7 and 8 to illustrate the arrangement or function of a default access network controller as defined in several claims. These figures illustrate what is described in the specification on pages 18 and 19: the connection of a mobile station by an access point (home base station (HBS)) to a default access network controller (home base controller or HBSC) which then provides the IP address information of an access network controller. New Figures 7 and 8 are very similar to Figures 4 and 5 and are modified to illustrate a default HBSC between the querying HBS and the distribution function or look-up table as described on pages 18 and 19.

Accordingly, Applicants believe that no new matter has been added since the subject matter illustrated finds support in the figures as originally filed (e.g., Figures 4 and 5) as well as in the text on pages 18 and 19. Approval and entry are respectfully requested.

Respectfully submitted,

NIXON & VANDERHYE P.C.
